

## DATA CENTERS

**Data centers are more than just real estate—they are mission-critical infrastructure powering the global digital economy. Understanding this, our attorneys combine technical knowledge of data center operations with legal acumen to deliver practical, business-focused advice that supports our clients' strategic objectives in this highly specialized industry.**

Our Data Center Industry Group weaves a matrix of multidisciplinary team members with experience serving the complex legal needs of data center owners, operators, developers, investors and end users. As the digital economy continues to expand exponentially, we provide forward-thinking legal solutions that address the unique challenges and opportunities in this rapidly evolving sector.

## Representative Experience

---

- Negotiated on behalf of a subsidiary of Viridien, a multinational geoscience technology services and high-performance computing company, for a long-term lease for more than 250,000 square feet of commercial office space and data center facilities for its North American headquarters in Houston.
- Created the employment infrastructure for an Australian sustainable bitcoin mining company, including both employment and immigration matters related to its expansion and the building of a data center in Texas.
- Represented a datacenter developer in several development projects, including negotiating the construction financing for those datacenters in multiple states.
