- 1) What regulatory frameworks are relevant to medical and recreational cannabis and the cultivation, manufacture, distribution etc. of cannabis and cannabinoids in the state?
- 2) What are the regulatory challenges in allowing the medical and recreational use of cannabis and cannabinoids in the state?
- 3) What regulatory frameworks are relevant for the cultivation, manufacture and supply of medicinal and recreational cannabis products in the state?
- 4) Which body is responsible for legislative controls relating to CBD?
- 5) Is there any possibility to commercialize CBD products without a Novel Food approval or medicinal product marketing authorization in the state?
- 6) What are the testing specifications in the state for determining the compliance of CBD with regulatory requirements (i.e. what are the testing specifications for determining the purity and/or level of any controlled substances in CBD?) and what documentation or evidence would need to be submitted to the regulatory authority in this regard?
- 7) Are there any regional limits on the quantity of CBD that can be purchased or imported?
